

# Gibco™ Phytohemagglutinin, M form (PHA-M)

This extract is capable of inducing blastogenesis *in vitro* in various mammalian mononuclear cells when used at a concentration of 1 to 2% v/v

**Supplier:** Gibco™ 10576015

## Description

- Made from a crude extract of the red kidney bean *Phaseolus vulgaris*
- Each lot is performance tested at 1.5% using peripheral blood lymphocytes from a normal adult donor cultured for 72 hours in Gibco™ RPMI 1640 Medium supplemented with Fetal Bovine Serum (FBS), heparin, antibiotics, and L-glutamine
- Manufactured at a cGMP compliant facility, located in Grand Island, New York, registered with the FDA as a medical device manufacturer and certified to ISO 13485 standards

Baculovirus Production and Titering, Cell Culture, Insect Cell Culture, Insect Expression, Protein Expression, Proteins, Expression, Isolation and Analysis

## Specifications

Content And Storage	<b>Storage conditions:</b> -5°C to -20°C. Protect from light. <b>Shipping conditions:</b> Dry ice <b>Shelf life:</b> 24 months from date of manufacture
Form	Liquid
Shelf Life	24 Months
Shipping Condition	Dry Ice

Cell Type	Mammalian Cells
Product Type	Phytohemagglutinin
Sterility	Sterile-filtered
